## ORACLE JD EDWARDS

You know the realities all too well: Time and resources are limited. Competition is stiff. Problems are increasingly complex. And the only constant is change.... To secure your company's position for the future, you need to take action today. Therein lies the challenge—a challenge Syntax is uniquely qualified to help you meet.

### **The leadership. The knowledge. The reputation.**

Syntax has been developing and implementing Enterprise Resource Planning (ERP) solutions across North America since 1972, long before the demand for ERP software exploded onto the marketplace. Since 1997, our focus has been on JD Edwards EnterpriseOne and World.

Today, more than a decade and hundreds of implementations later, we rank at the industry forefront, a clear leader in providing the in-depth knowledge and experience demanded for the JD Edwards solution set.

### **Selective. Focused. Driven.**

Unlike conventional systems integrators and providers of technology applications, Syntax does not pretend to be all things to all people. Rather, we specialize in emerging and mid-market companies within a few, highly selective fields.

Our handpicked team of dedicated consultants responds with the insight and experience to do the job right, applying hands-on skills and information gleaned from a varied range of backgrounds and industries. It is a value-added advantage that ensures your specific objectives are fully met with the best solutions possible—solutions determined, provided and implemented by Syntax.

### **Oracle Accelerate Solutions for JD Edwards from Syntax. Industry-focused. Easy to own.**

Software, hardware, and services—pre-configured and all from a single source to keep you in control. This comprehensive set of low-cost, low-risk JD Edwards applications delivers high functionality in accordance with industry best practices.

Oracle Accelerators exemplify the ways in which Syntax.net addresses the needs of small and medium businesses, enabling users to control their budgets and rapidly achieve real business value.

*There are over 80 JD Edwards application modules that cover an extensive set of business operations. For example:*

- *Manufacturing*
- *Order Management*
- *Supply Chain Planning*
- *Supply Chain Execution (Logistics)*
- *Supply Management (Procurement)*
- *Financial Management*
- *Food and Beverage Producers*
- *Project Management*
- *Real Estate and Home Construction*
- *Customer Relationship Management (CRM)*
- *Capital Asset Management*
- *Analytics*
- *Human Capital Management (HCM)*
- *Tools and Technology*
